

PEACHY AMA RECAP

1: How does your project keep up with the fast-paced crypto industry, adapting to new tech trends? What's your long-term vision for the industry?

1 : Our erotic entertainment project is committed to keeping up with emerging trends and technologies within the cryptocurrency industry. Through the use of NFT, interactive live shows, Exclusive rewards for the community with our SLIPDROP, erotic market analysis, a dedicated marketplace and much more under development...we are constantly working to offer an engaging and innovative experience to our users.

Looking to the future, we see an expansion of the erotic entertainment industry on blockchain, with greater audience adoption and a diversification of content offerings. You can really indulge yourself, our long-term vision includes creating a vibrant and inclusive ecosystem where artists can thrive and users can enjoy unique and personalized experiences.

We are committed to staying at the forefront of delivering innovation and value within our Peachy ecosystem to our users/investors. A lot of work has been done to get here, I want to emphasize that all of our content is hand drawn by our graphic designer.

2: Your project name is catchy! Any cool story behind it? What inspired the choice?

2.EHEH is eye-catching and straightforward don't you think? The name "Peachy" was chosen to evoke a sense of sensuality and sweetness, as well as convey an atmosphere of freshness and fun. The inspiration comes from the inviting form of peach, which perfectly represents the essence of feminine beauty and sexuality. ;)

We want our users to feel appreciated, satisfied and eager to come back to discover new sensual and engaging experiences. In short, the name Peachy reflects our commitment to offer high-quality erotic entertainment, with sweetness and seduction.

3: Global expansion plans—are you focusing on markets, development, customers, or partnerships? How's the balancing act going?

3. I will try to be as brief as possible. As for what we focus on right now is, the community. Peachy is in development and like all healthy and sustainable projects needs time and work to then be able to take the market share that it deserves. All this can only be supported by a strong community. We have several partnerships linked to groups that support us with marketing and many interesting requests to evaluate related to development, which will not only be within the network.

We want to anticipate future needs and new functionalities, all this requires a lot of research, the development of the entire ecosystem is a real challenge that we are ready to face. Our slogan is... where Memes come to life. When Peachy is fully operational, You'll see something you've never seen before.

4: Investors often chase short-term gains. What makes your token a good long-term hold? What's the unique value?

4. What makes our token a solid long-term seal is our commitment to creating a sustainable and vibrant ecosystem in the erotic entertainment industry. We focus not only on short-term gains, but rather on building a solid and durable project that offers long-term value.

Our token stands out for several reasons. First, we aim to build a strong and engaged community that supports the project over time, ensuring a solid foundation for growth and adoption. We are committed to anticipating the future needs of the market and implementing innovative features that keep our ecosystem in step with the evolution of Web 3.0.

Beyond that, we at PEACHY like to be transparent, giving voice to our community and allowing investors to actively participate in key project decisions. We're considering opening a dedicated channel on Discord to further prioritize the community.

5: Biggest project milestone so far? And what's next on the roadmap?

5. Surely be already listed on 2 exchanges and see that our Holders remain faithful to the project, also we did not expect so many listing offers from CEXs. Thanks to all the work done so far, Peachy is reviving interest from the audience and this thing gratifies us.

Is that our main goal?

Become a leading entertainment company in the crypto world, disguised as MEME COIN.

In the short term, we are focused on the creation/classification and development of NFT. Having real use cases within our ecosystem, we must ensure that NFTs are balanced, as well as stimulating and fun for the end user. There is still a lot of work to do to get a top product, but it will impact!

6: How are you bringing non-crypto folks into your ecosystem? Balancing tech growth and token value—how do you do it?

6. Bringing non-crypto-native people into our ecosystem is one of our priorities, as we believe that mainstream cryptocurrency adoption is essential for the long-term success of our project.

We have already planned to develop clear and intuitive tutorials that guide users through the process of registering and using our platform, going to explain the key concepts of cryptocurrencies in a simple and accessible way.

Over time will come partnerships with non-crypto-native brands and platforms, this will allow us to reach a wider audience and introduce cryptocurrencies in more "familiar" contexts helping to reduce entry barriers for new users.

The growth of the value of the Peachy token is closely related between, our work and community support, in terms of project confidence and market exchange/volume.

7: Why should someone buy your tokens now? And for current holders, why hold on?

7. I believe that the answer to this question for those who are reading live or will read it in the coming days, we have already summarized it in the previous answers. Peachy has the goal of becoming a company and this need for an endless series of components, of which the main one is time. To see our supporters/investors one day become our customers.. is part of our mission. Every person is aware of the possible advantages that derive from having made the correct choices with the right timing in personal investments, we are not and do not want to be a pump-and-dump project, Peachy is in incubation and will mature and evolve from month to month. As always, patience will shift wealth.

8: Plans for rapid growth—users, global markets, partners? How are you building a strong community?

8. Peachy is one of those few COIN MEME projects that can afford to have a launch on the Dex and at the same time another planned exchange on a Cex. I think this should make investors think about the truth/seriousness of the team and the project itself. Much marketing has been done, both by us, by you P2B, as well as by your internal agency.

We wanted to aim to have another exchange on another CEX by the end of February, but we realized working on the business plan week after week that, is not at the moment among our priorities. But, surely we are considering inserting another Cex by the end of March.

As for the community, I think marketing has a big role and we will continue to push, but word of mouth is always the best weapon. For this to happen, we need to get talking about ourselves, and believe me, the first delights that we at PEACHY have planned will not be long in coming.

9: Security matters. Any platform audits done? What's in place to keep things safe?

9. We integrate the latest blockchain technologies to ensure security and transparency within our ecosystem. We also have a security engineer on the computer network.

Our smart contract has been created and audited (score 90/100) from the top 1 partner of Pinksale CFGNINJA.

We were asked about the reason for our visible "external call" (item 15 of our smart contract), which is nothing more than the proxy for the pinksale antibody.

It's a shame that the GOPLUS service for this, on CG for example, Peachy signals with totally bogus alerts, such as changing taxes/trade break/mint tokens etc.

We have already contacted them, who have confirmed the proxy of the PINKSALE ANTIBOT and absolutely there is nothing suspicious/irregular.

Users can verify with confidence that PEACHY is 100% safe, as you responsible for P2B have done, to ensure your users the solidity of the smart contract.

I also remember that the CEO passed 2 KYC , from P2B and Pinksale.

In the roadmap there is definitely a Certik Audit.

10: Where's the go-to spot for the latest project updates? Where can people stay in the loop?

10. Our Telegram Group remains the main point of reference for every update/evolution

<https://t.me/PeachyClub69> , here we will post in real time anything. Besides the website Peachyclub.net and Twitter: <https://twitter.com/PeachyClub69> reopened a few days ago.

I want to emphasize the importance for all users who want to follow/ support us to always follow our official channels starting from the website, we are already aware of groups Peachy SCAM. Be careful, safety first.
